PROFESSIONAL SUMMARY

Backend Software Engineer specializing in Java and SQL, with a B.Tech in Information Technology (CGPA 8.72/10) and hands-on training in server-side application development through the Infosys Foundation Program. Skilled in Object-Oriented Design, the Java Collections Framework, JDBC, relational database design, and query optimization, with additional exposure to Python-based Machine Learning and Computer Vision projects. Second Prize winner at a 300+ team hackathon. Targeting backend/full-stack Software Engineer roles building scalable, data-driven systems.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript

Core Java: OOP, Collections Framework, Exception Handling, Multithreading, File I/O, JDBC

Databases: MySQL, PostgreSQL, HSQLDB, Query Optimization, Normalization, Stored Procedures

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Software Practices: SDLC, Agile Methodology, Unit Testing, Debugging, Code Review, Git, GitHub, Version Control

Tools & Platforms: Eclipse IDE, Visual Studio Code, Linux, Windows

Web Technologies: HTML5, CSS3

AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, OpenCV

PROFESSIONAL EXPERIENCE

Infosys Ltd., Mysuru

Feb 2026 – Jun 2026

Trainee, Foundation Program — Java & SQL Development Track

- Ranked among top performers in a competitive-entry engineering training program covering Java, SQL, DBMS, SDLC, Agile methodology, secure coding, and cloud fundamentals.
- Delivered working Java applications applying OOP principles, the Collections Framework, JDBC, exception handling, file handling, and multithreading, each validated through peer code review.
- Rewrote and optimized SQL queries using joins, normalization, views, and stored procedures, improving query readability and eliminating data-integrity issues across sample database projects.
- Raised code quality and maintainability by systematically debugging, unit testing, and reviewing peer-submitted code across training assignments.

The Singareni Collieries Company Limited, Srirampur

Feb 2022 – Aug 2022

Industrial Trainee, IT Department

- Kept end-user downtime to a minimum by configuring desktops, installing software, and maintaining OS installs across the IT department.
- Resolved hardware, software, and network issues at the point of report; reduced repeat incidents through clear technical documentation.

PROJECTS

DeepEYE — AI-Based Video Surveillance with Anomaly Detection — *Python, OpenCV, Deep Learning*

- Built an end-to-end computer vision pipeline that ingests real-time video streams and flags abnormal activity using deep learning-based anomaly detection, achieving 94% detection accuracy on the test set.
- Implemented image preprocessing and feature extraction stages that reduced false positive alerts by 91% and processed frames at 24 FPS for continuous monitoring.

Harvestify — Smart Agriculture Recommendation System — *Python, Machine Learning, Deep Learning*

- Developed supervised ML models for crop recommendation, fertilizer suggestion, and plant disease prediction, reaching 96% prediction accuracy on held-out agricultural data.
- Engineered features and preprocessing pipelines that improved model input quality, cutting prediction error by 12% versus the baseline model.

AINAT — Artificial Intelligence Attendance Terminal — *Python, OpenCV, Face Recognition*

- Built a real-time face-recognition attendance system achieving 95% recognition accuracy at an average latency of 180ms per face.
- Eliminated manual attendance tracking by automating detection and recording, cutting attendance processing time by 90% versus the manual process.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology

2022 – 2025

Bachelor of Technology (B.Tech), Information Technology — CGPA: 8.72 / 10

Singareni Collieries Polytechnic College

2019 – 2022

Diploma, Computer Engineering — CGPA: 8.14 / 10

CERTIFICATIONS & ACHIEVEMENTS

Programming and OOP using Java — Infosys | Database Management System (HSQLDB) — Infosys | Foundations of SDLC, Agile and Lean Methodologies — Infosys | AWS Academy Cloud Foundations | Java Training — IIT Bombay Spoken Tutorial

- Won Second Prize, Smart Campus Hackathon (300+ teams); completed Infosys Foundation Program with all technical assessments and coding assignments passed.
